Education

BS Computer Science **FAST National University of Computer and Engineering Sciences**
2022-2026

- CGPA: 3.99
- Relevant coursework: Object Oriented Programming, Data Structures, Operating Systems, Database Systems, Design and Analysis of algorithms, Parallel and Distributed Computing.

O/A Level **The City School** **2018-2022**

Skills & Tools

- **Programming Languages:** Java, Python, C/C++, JavaScript
- **Frontend Development:** HTML, CSS, Tailwind CSS, ReactJS
- **Backend Development:** NodeJS, ExpressJS
- **Database Management:** Oracle, MySQL, MongoDB, PostgreSQL

Work Experience

Teaching Assistant of Programming Fundamentals at FAST **Aug 2023-Dec 2023**

Assisted students in course related work, while helping the course instructor in grading the sessional assessments.

Student Lab Assistant of Data Structures at FAST **Aug 2024-Dec 2024**

As SLA for the course, I assisted the students in solving problems assigned to them during the lectures.

Web Development Frontend Lead for The Bridge of Hopes Organization (FAST) Mar'2024-Present

This organization, led by a faculty member from FAST, is dedicated to providing education for children with special needs. [see more](#)

Projects

Full-Stack Food Ordering and Delivery Website [see more](#)

- Designed and implemented a responsive web application for food ordering using ReactJS (frontend) and NodeJS with ExpressJS (backend).
- Designed and implemented RESTful APIs for robust user authentication, order management, delivery management, restaurant management and role-based access control, supporting multiple user roles (restaurant owners, delivery riders, and admins) using secure JWT mechanisms.
- Integrated Nodemailer to enable email notifications for email verification, order confirmations, and delivery updates.
- Implemented MySQL for database management including database triggers, transactions, and auditing.
- Configured push notifications to alert users of promotions and order updates in real-time.

Data Odyssey/SQL competition platform [see more](#)

Developed a real-time SQL competition platform using React.js and Tailwind CSS, enabling multiple teams to compete in solving database challenges. Implemented features including:

- Dynamic leaderboard system tracking team progress across difficulty levels
- Real-time file submission evaluation system with status tracking and detailed feedback using Multer and Web sockets.
- Multi-level competition progression system with query validation using the OneCompiler API.
- Secure authentication system with team-based access control using JWT.
- Responsive design supporting multiple SQL dialects (MySQL, PostgreSQL, Oracle, NoSQL).
- Tech Stack: ReactJS, Tailwind CSS, NodeJS, ExpressJS, MySQL.

Certificates and Achievements

- **1st Position** across the batch in the 3rd, 4th, and 5th semesters
- **2nd Position** across the batch in the 1st semester.
- Rector's List of Honors (4 SGPA) in the 3rd, 4th, and 5th semesters.
- Dean's List of Honors in 1st, and 2nd semesters
